## (54) TESTING DEVICE FOR COMMUNICATION PROTOCOL

## (57)Abstract:

**PROBLEM TO BE SOLVED:** To provide a testing device for a communication protocol with which an internal variable of the communication protocol of a device to be tested is estimated and the communication protocol is evaluated on the basis of the estimated result.  
**SOLUTION:** In the testing device for the communication protocol with which data are exchanged by communicating with the device to be tested and the communication protocol packaged in the device to be tested is evaluated, the testing device is provided with an estimation means for estimating the internal variable on the communication protocol of the device to be tested, and an evaluation means for evaluating the communication protocol of the device to be tested on the

basis of the estimated internal variable. The estimation means estimates the internal variable on the basis of data transmitted from the device to be tested to the testing device and data transmitted from the testing device to the device to be tested.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
